**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

Claims 25 and 40-57 as amended (6/09/2006) are presently pending and under examination.

***Priority***

The information concerning the benefit claims of prior application 09/669,051 which in turns claims benefit of US provisional application 60/155,937 filed 9/24/1999 in the instant application transmittal letter dated 9/24/2003 has been acknowledged.

***Response to Arguments***

Applicant's arguments filed 6/09/2006, see response pages 6-9, with respect to the pending claims have been fully considered and are persuasive. The claim rejections under 35 U.S.C. 112, first paragraph, and under 35 U.S.C. 103(a) as being unpatentable over Kalles et al. ("Elastase-Induced Aneurysms in Rabbits: A Dose-Escalation Study". American Journal of Neuroradiology. February 2002, Vol. 23, No. 2, pages 295-298) and US 5,834,449 (Thomspson et al.) have been withdrawn.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting

Art Unit: 1651

ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 25 and 40-57 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 7,063,838.

Although the conflicting claims are not identical, they are not patentably distinct from each other because they are directed to the similar methods for enlarging the diameter of an artery or vein by locally administering to wall of the artery or vein in the human subject a composition with elastase in a dose sufficient to cause enlargement of the diameter of the artery or vein, thereby, treating obstructed artery or vein. Some of the pending and issued conflicting claims are further drawn to the use of pancreatic elastase and to devices for elastase delivery including catheter. Some the pending and issued conflicting claims are/are further drawn to enlarging the diameter of arteries or veins including coronary artery that are obstructed as result of stenosis, intimal hyperplasia and/or applications arteriovenous hemodialysis grafts.

Accordingly, the claimed methods in the issued patent and in the present application are obvious variants.

Therefore, the inventions as claimed are co-extensive.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1651

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
